

## HORIZONTAL HANGING

### SUPPLEMENTARY INSTALLATION GUIDELINES

One and the same wallcovering. On the left picture installed horizontally, on the right picture installed vertically. A completely different result. Which one do you prefer?

## INSTALLATION

Starting from the corner, measure a distance which is 5 cm (2 inches) shorter than the width of the wallcovering and mark that place. Use a laser level to indicate a vertical line on that spot, from one corner to the other. This line will serve as a guideline during the installation of the first strip.

Please refer to the installation guidelines of the wallcovering of your choice for further instructions.
